

Map of Europe showing sampling locations for four categories:

- nonapprovK (red circle)
- truezerodetect (blue circle)
- repl1pos (green circle)
- repl2pos (purple circle)

Each location is marked with a colored circle and a sample size 'n' value. The map shows a high density of samples in Central and Eastern Europe, particularly in Poland and the Baltic region, with fewer samples in Western Europe and the Iberian Peninsula.
