

Map of the British Isles showing sampling locations and sample sizes (n) for four categories:

- nonapprovK (Red dots)
- truezerodetect (Blue dots)
- repl1pos (Light Green dots)
- repl2pos (Dark Green dots)

Sample sizes (n) are indicated next to each dot. The map shows a high density of samples in the central and eastern regions of the British Isles, particularly in the area around London and the southeast of England. The western regions, including Scotland and Wales, have fewer samples. The Republic of Ireland has a single sample (n=2) in the southeast.
