

Map of the British Isles showing sampling locations and results. The legend indicates four categories:

- nonapprovK (Red dot)
- truezerodetect (Blue dot)
- repl1pos (Green dot)
- repl2pos (Dark Green dot)

Sampling locations are marked with colored dots and labeled with sample sizes (n) or counts (R). The map shows a high density of samples in the south of England, particularly around London, and more scattered samples in Scotland, Wales, and Ireland.
