

Map of the British Isles showing sampling locations and results. The legend indicates four categories:

- nonapprovK (red dot)
- truezerodetect (blue dot)
- repl1pos (green dot)
- repl2pos (dark green dot)

Each point is labeled with a sample size 'n'. The map shows a high density of samples in the central and eastern regions, with some samples in the north and west. The results are distributed across the islands, with some locations showing multiple samples (e.g., n=4, n=3, n=2, n=1).
