

Map of Europe showing sampling locations. The legend indicates four categories:

- nonapprovK (Red dot)
- truezerodetect (Blue dot)
- repl1pos (Green dot)
- repl2pos (Dark Green dot)

Sampling locations are marked with colored dots and labeled with 'n' values, indicating the number of samples collected at each location. The map shows a high density of sampling locations in the British Isles, particularly in the south and east, and a more sparse distribution in Scandinavia and Central Europe.
