

Map of the British Isles showing sampling locations for four methods. The legend indicates the following categories:

- nonapprovK (Red dot)
- truezerodetect (Blue dot)
- repl1pos (Green dot)
- repl2pos (Dark green dot)

Each sampling location is labeled with a sample size 'n'. The map shows a high density of sampling points in the central and eastern regions of the British Isles, with some points in the north and west. The sample sizes vary, with many points having n=4, and a few having n=6 or n=8.
